

# Septic Tanks

Technical Details and Specifications

*The Power behind  
the Solution*

**TITAN**

Number One & Still Growing

Model	ST600
Capacity Ltr/Gal	2730/600
Diameter	1760mm
Height	1960mm
Neck Height	460mm

Model	ST800
Capacity Ltr/Gal	3635/800
Diameter	1940mm
Height	2120mm
Neck Height	460mm

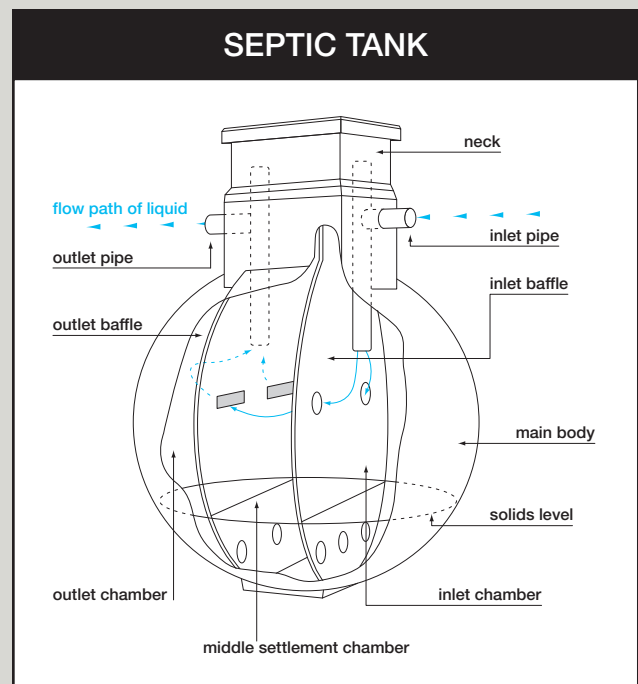

Model	ST1000
Capacity Ltr/Gal	4540/1000
Diameter	2000mm
Height	2370mm
Neck Height	460mm

As Europe's largest producer of rotationally moulded plastic products, the name Titan has come to stand for excellence in design, quality and performance. Titan's Septic Tank range is a leading example of the company's advanced pollution prevention systems. The unique design and many advanced features of the Titan Septic Tank range reflect the heritage and commitment of a company dedicated to pioneering developments.

Available locally through all good builders' merchants, the distinctive black body and yellow neck of the Titan Septic Tank has the following features:

- Designed with superior quality to ensure strength and durability.
- Robust, with high impact resistance, ideal for on or off-site storage.
- Can withstand all common domestic chemicals.
- No chemicals are required for bacterial action to take place.
- Simple to install, with full installation instructions supplied with each tank.
- Modern design means that access for desludging is easier through the wide neck. Extension necks are available to complement all Titan's Septic Tanks.
- Suitable for most ground applications where the criteria of a T-Test is met. Titan Septic Tanks are available with capacities of 2730 litres (600 gallons), 3635 litres (800 gallons) which are suitable for up to an 8 person dwelling and a 4540 litres (1000 gallons) for an 8 to 12 person dwelling.
